D3.3 Bayesian Decision Support System

Deliverable No D3.3 - Bayesian Decision Support System
No. 14833
Date: March 2015

Grant Agreement No 603442
DC Research - FP7-ENV-2010-181568-1

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 101019715. The content of this document is the sole responsibility of the author(s) and the RISC-KIT consortium. It does not necessarily reflect the views of the European Union or the Commission of the European Communities. The Commission cannot be held responsible for any errors or for any consequences arising from the use of the information contained in this document. The RISC-KIT consortium is a public-private partnership between the RISC-KIT members.

RISC-KIT in Cordis News

CORDIS, the Community Research and Development Information Service of EC published an article regarding RISC-KIT's Policy Brief as well as the aims and goals of the project.

Other News

2015/03/24

WCDDR: Historic framework adopted at the UN Conference on Disaster Risk Reduction

Goals for the significant decrease of the disastrous impacts of extreme natural hazards around the world were set in Sendai Japan, at the Third UN World Conference for Disaster Risk Reduction.

2015/03/20

New research: Flood strategies could be improved with help of socio-demographic data

New research suggests flood management could be improved by including socio-demographic information in the assessment of flood risk. The research combined traditional flood risk assessment with information on the 'social vulnerability' of people living in flood risk areas. The proposed methodology was applied to Rotterdam, NL.

2015/03/10

EC: The Water Framework Directive and the Floods Directive - Actions towards the 'good status' of EU water and to reduce flood risks

European Commission published a communication to the European Parliament and the Council under the title "The Water Framework Directive and the Floods Directive - Actions towards the 'good status' of EU water and to reduce flood risks"

2015/03/01

ENHANCE Project - Partnership for Risk Reduction, released a new promotional video!

ENHANCE project aims to developing and analysing new ways to enhance society's resilience to catastrophic natural hazard impacts. This time they did so through their new video!
